

# MULTIPLE SCLEROSIS STUDY

The Cognitive Neurophysiology Lab at Albert Einstein College of Medicine is recruiting people with multiple sclerosis, ages 25-45 years, for a research study to evaluate physical and cognitive health during treadmill walking.

Requirements: You will be asked to walk on a treadmill and do some simple cognitive tasks while we record your brain waves using EEG (approximately 1 hour of walking, 3-4 hours in total including set up and frequent breaks).

EEG is a non-invasive method to look at brain activity.

**Compensation of \$15 per hour is provided**

For more information about the study and your eligibility:
